16/11/22

Wednesday

8:47 P.M

@HOME Date: _____

DAY 4 : Problem - 1 (Target Sum)

9:47 - Break (Dinner)

11:24 - Start again

Example -

let array nums be

nums[] = [1, 1, 1, 1, 1]

Target sum $\leftarrow$ T.S = 3

$$1 + 1 + 1 + 1 - 1 = 3$$

$$1 + 1 - 1 + 1 + 1 = 3$$

$$-1 + 1 + 1 + 1 + 1 = 3$$

} ways

nums[] = [1, 2, 3, 4, 5]

T.S = 4

$$1 + 2 + 3 + 4 - 5 = 5 \quad \times$$

$$2 + 3 - 5 + 4 + 1 = 5 \quad \times$$

$\therefore$ no possible ways to
do T.S 5

$\therefore$ return 0;
